

THE GARDENS

Set in the lush garden surrounding UOW UniBar, this space is a great option to execute outdoor festival-type events with top-tier headline acts. The space is cordoned off with load-in fencing, while an outdoor stage is built to specification to suit the event and maximise punter experience.

The Gardens can accommodate up to 4000 payers. In the event of poor weather, the Great Hall can be used as a wet-weather contingency up to 2500 capacity. It is recommended to sell to the wet weather contingency cap, before releasing the final allocation when the forecast is clear. The venue is NOT liable for loss of ticket sales revenue in this eventuality. Read further for full specs.

EXTRA INFORMATION:

- Available Saturdays only.
- Event must run for at-least 6 hours minimum.
- Event promoters must have their own event day liaison staff (at least one).
- Turf protection (up to 500m2) in front of the stage must be supplied. A pre & post site inspection of the lawn's condition must take place to assess whether any turf damage resulting from the event has occurred. If ticket sales exceed 3000, the venue will cover half the cost of the turf protection (grass tiles).
- Any remediation required to restore turf to original condition will be at the artist's expense.

FACILITIES

- Fully licensed green field open air festival site.
- All staffing & security will be provided.
